JACK BERMAN
PRIMARY EXAMINER

Art Unit: 2881

The following is an examiner's statement of reasons for allowance: The prior art does not teach to switch between a high drift voltage and a low drift voltage in an ion mobility spectrometer.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. At lines 3-61 in column 8, Blanchard (U.S. Patent No. 4,855,595) teaches to apply a higher voltage to selected electrodes inside the drift chamber of an ion mobility spectrometer, but this higher voltage is specified as being provided on either side of a transition region to form a potential well and therefore cannot be considered a drift voltage, i.e. the voltage that urges ions to move in selected directions in a gas flow. Ichimura et al. (U.S. Patent Application Publication No. 2003/0213903) teaches to vary the drift voltage in an ion mobility spectrometer, but this reference is not available as prior art because its U.S. filing date of May 15, 2003 is after the July 31, 2002 filing date of Provisional Patent Application No. 60/400,192, from which the instant application claims priority under 35 U.S.C. §119(e).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.
